PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate at Manipal University Jaipur with hands-on experience in Python, React.js, Django, SQL, and AI/ML development. Built deep-learning and web-based applications using TensorFlow, React, and Node.js. Seeking Software Development, AI Engineering, or Full-Stack Development opportunities.

WORK EXPERIENCES

Junior AI Engineer - Karmaa Lab & Plausibility Solutions

- Developed ScrapeFlow, a full-stack data scraping and job aggregation platform using Django, DRF, React, Vite, Tailwind CSS, and SQLite.
- Integrated multiple job APIs and implemented job normalization, deduplication, provider-priority ranking, and centralized data storage.
- Built automated college, company, and LinkedIn scraping workflows with structured data extraction and JD matching.
- Customized an existing LiveKit-based video conferencing platform using Next.js and TypeScript, implementing company-specific meeting UI, controls, and administrative functionality.

May 2026 - Aug 2026
Remote • Jaipur

Intern - ONGC

- Interned for 1.5 months, gaining valuable exposure to IT systems and industrial workflows.
- Enhanced professional and teamwork skills through active industry interaction.

Jun 2025 - Aug 2026
Remote • Karaikal

PROJECTS

ScrapeFlow – Multi-Source Data Scraping & Job Aggregation Platform

- Developed a full-stack scraping platform using Django, DRF, React, Vite, Tailwind CSS, and SQLite.
- Integrated Adzuna, Jooble, JSearch, and SerpAPI with job normalization, deduplication, and provider-priority ranking.
- Built automated college, company, and LinkedIn post scraping workflows with structured data extraction and JD matching.
- Developed REST APIs and dashboard features for scraper management, search history, missing contacts, and centralized data storage.

LiveKit Meet – Custom Video Conferencing App

- Customized an existing LiveKit-based video conferencing platform using Next.js and TypeScript to meet company-specific meeting requirements.
- Developed and integrated custom meeting UI, controls, and administrative functionality on top of the existing LiveKit infrastructure.

StudyTree – AI Assistant for Students

- Developed a responsive React.js frontend for an AI-powered student assistant platform with study-organization features.

Wildfire Prediction using Deep Learning

- Developed a CNN-based wildfire prediction model using Python, TensorFlow, Pandas, and NumPy.
- Processed and analyzed environmental datasets through feature engineering and data preprocessing.
- Applied hyperparameter tuning to optimize model performance and achieved 88.73% validation accuracy.

SKILLS

Databases :	SQLite, MySQL
Frameworks & Libraries:	TensorFlow, React, Node.js, Django, REST API
Programming Languages:	C, C++, Python, SQL, JavaScript
Soft Skills:	Problem-Solving, Adaptability, Teamwork, Communication
Tools & Platforms:	Git, GitHub, VS Code

EDUCATIONS

Manipal University Jaipur | Jaipur, India
B.Tech Computer Science (AI & ML)

Aug 2023 - Jul 2027

Green Valley High School | Vadodara, India
Class 12

Apr 2022 - Mar 2023

Delhi Public School | Vadodara, India
Class 10

Apr 2020 - Mar 2021

CERTIFICATIONS

NPTEL – Deep Learning (Elite Certification)

Python Essentials 1 – Cisco Networking Academy & OpenEDG Python Institute

Python Essentials 2 – Cisco Networking Academy & OpenEDG Python Institute
